

Marling Mathematics 2024 Summer Transition Work

In the transition book there are a number of topics that we consider to be important for Yr12. In order to maintain your mathematical skills over the summer it is essential that you revisit these topics.

Each topic has three sections: Introduce, Strengthen and Deepen.

Our requirement is that you complete the 'Strengthen' and 'Deepen' sections. If for any reason there is a question you can't do, leave it and we can address this at the start of Yr12.

We look forward to welcoming you to Mathematics Department in September.

Mr. Jordan

Head of Mathematics
